

Klonzo Trail System

RECOMMENDED ROUTES

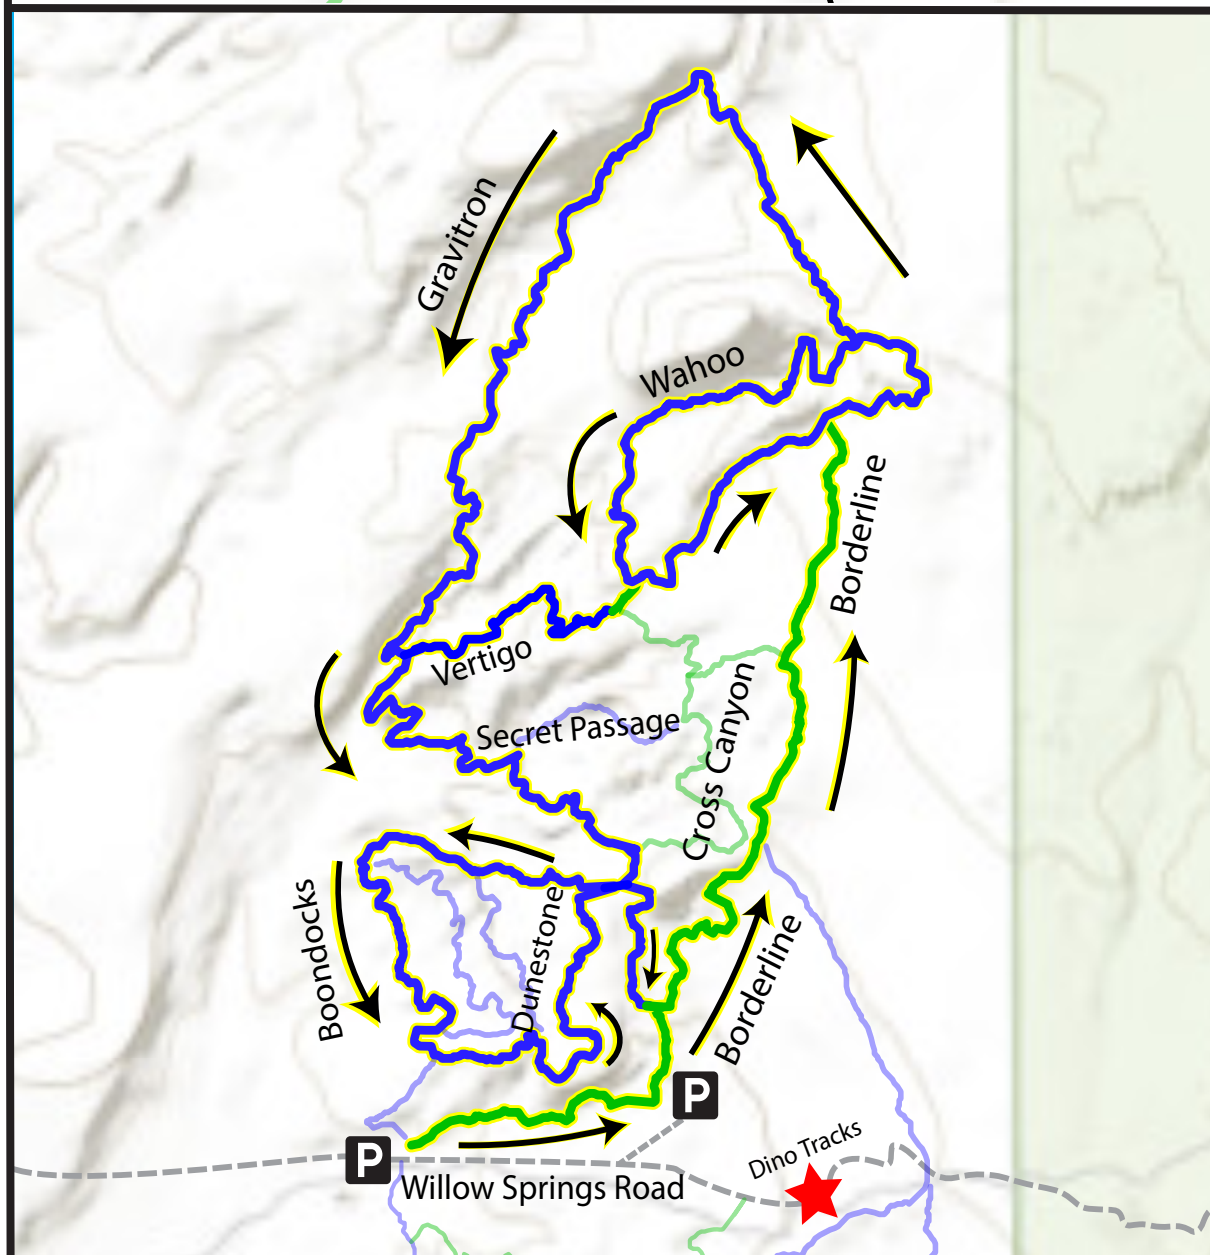

Recommended Beginner Route

Borderline | Willow Springs Road | Midway | Carousel | Hot Dog | The Edge

This great beginner route will help you get acquainted with the southern Klonzo trail area. Begin on **Borderline** from Parking Lot A, then bike down to **Willow Springs Road** to catch **Midway**. Look out for two dinosaur track sites within the trail system: the first a short ride out on Willow Springs Road, and the second on **Carousel**. For a longer ride, consider taking the offshoot trails within Carousel (Gypsy, Magician, Wizard). These can be ridden in any order and direction in the loop to add mileage.

Total Distance: 3.8 miles
Estimated Time: 2-4 hours*

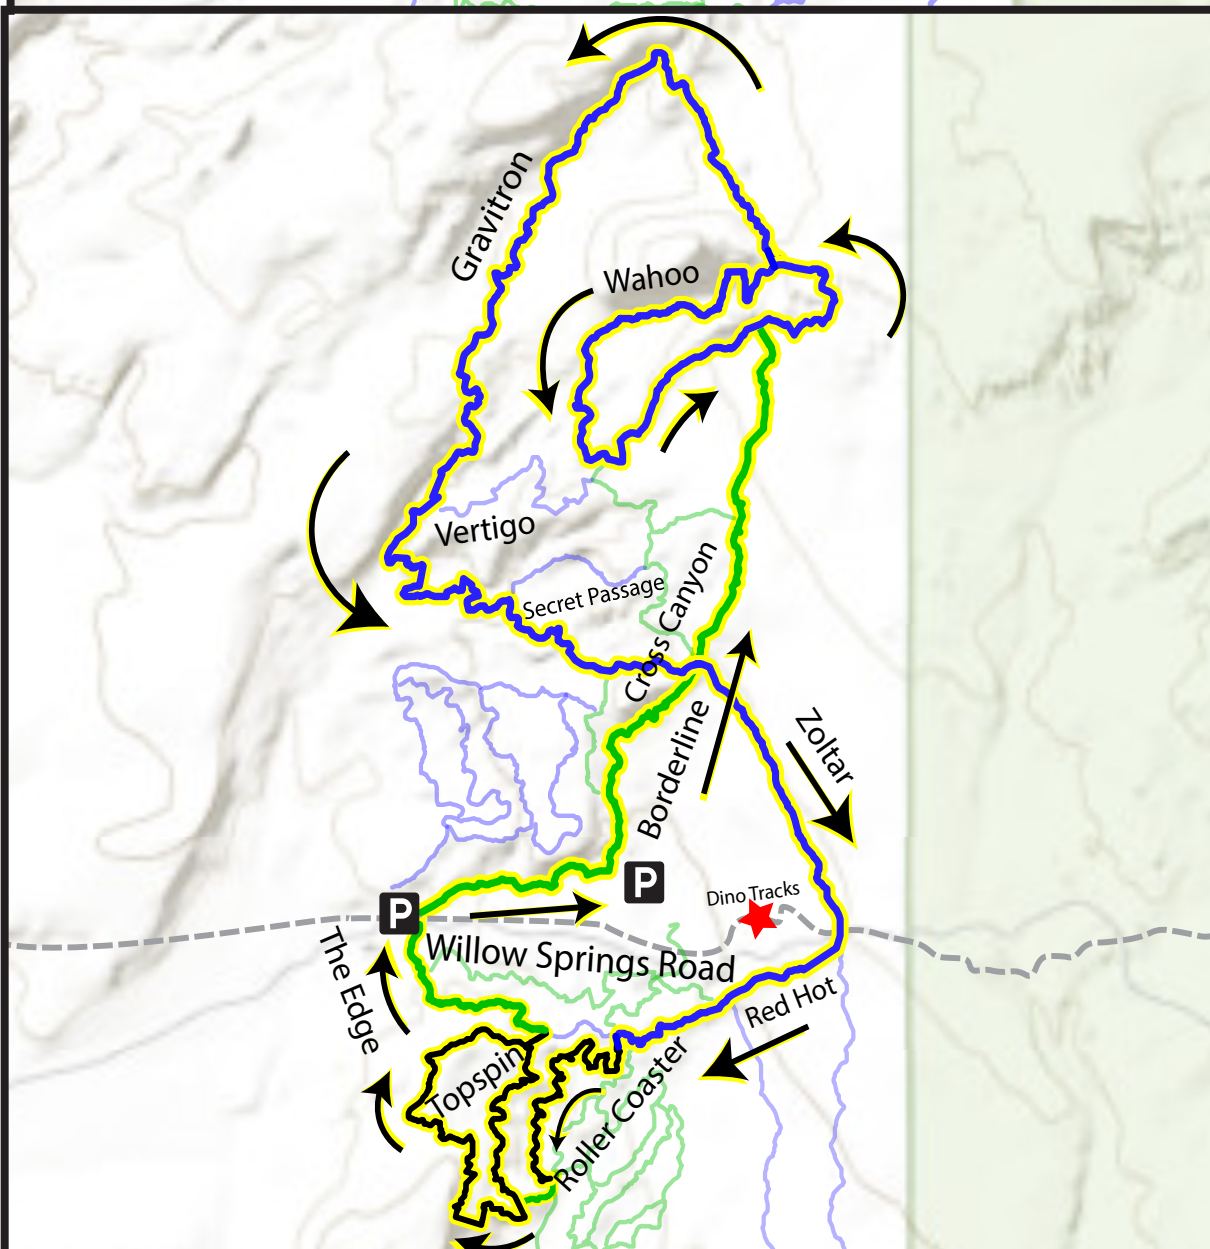

Recommended Intermediate Route

Borderline | Wahoo | Gravitron | Dunestone | Boondocks

This loop will take you into the northernmost part of the Klonzo system and features two great downhill sections on **Wahoo** and **Gravitron** trails. Gravitron will test your riding abilities as an intermediate/advanced trail. If the riding difficulty on Wahoo challenges you, skip the more advanced Gravitron: from Wahoo, take Cross Canyon to Vertigo. Continue on Vertigo to the end of Gravitron and continue the route from there.

Total Distance: 8 miles
Estimated Time: 2-4 hours*

Recommended Intermediate/Advanced Route

Borderline | Wahoo | Gravitron | Zoltar | Red Hot | Roller Coaster | Topspin | The Edge

This route covers both the northern and southern parts of the Klonzo system. Start on **Borderline** and ride north to **Wahoo**. After riding both these fun trails, make your way to the **Zoltar**. Zoltar is entirely on rolling sandstone rock fins and will connect you to the top of the southern Klonzo Trails. **Red Hot** and **Roller Coaster** are primarily downhill trending from east to west and offer a fun flowy trail experience over rolling hills. At the end of this downhill, enjoy a spin on **Top Spin** to get a few more technical rock moves in before your final descent back to the main trailhead on **The Edge**.

Total Distance: 10 miles
Estimated Time: 2-4 hours*

* Note that route completion time may widely vary based on the individual rider's skill level, experience, and various other factors.
